**20L**

  
**HuMates™**  
HIGH PERFORMANCE ORGANIC HUMATE

**Before using Humic Supreme read label carefully.**

#### APPLICATION RATES FOR GROUND USE

| GROUND CROPS                 | RATE SOIL APPLICATION | COMMENTS                                                                                          |
|------------------------------|-----------------------|---------------------------------------------------------------------------------------------------|
| Pasture                      | 10L /ha               | Apply up to 5 times per season in adequate water to provide complete ground coverage.             |
| Vegetables                   | 5-10L /ha             | Apply 5L as soil drench prior to planting. Apply 5-10L/ha at intervals during the next 4-6 weeks. |
| Forage/Brassicas/Wheat       | 2-5L /ha              | Broadcast apply prior to planting.                                                                |
| Maize & Row Crops            | 2-3L /ha              | Dribble into seed furrow at planting time.                                                        |
| Pip/Stone/Citrus Fruit Trees | 10L /ha               | Apply 3 to 4 weeks prior to budburst & repeat application in February.                            |
| Kiwifruit/Grapevines         | 10L /ha               | Apply 3 to 4 weeks prior to budburst & repeat application in February.                            |
| Turf                         | 5-10L /ha             | Apply in spring & repeat in February.                                                             |

#### MIXING INSTRUCTIONS

1. Shake Humic Supreme before mixing.
2. Half fill spray tank with water.
3. Add Humic Supreme then compatible chemicals while maintaining agitation.
4. Fill spray tank to full volume with water while maintaining agitation.

#### APPLICATION GUIDELINES

Dilution rate: 1 litre Humic Supreme in a minimum of 20/30 litres of water. Where higher water rates are required for good coverage do not exceed maximum product rate per hectare. Can be applied by boom spray, aerial spray or fertigation. Ensure that adequate water rates are applied to provide complete ground coverage. Humic Supreme should be applied to the soil; foliar contact on sensitive crops should be washed off as staining could occur. For foliar feeding use Fulvic Express.

#### COMPATIBILITY WITH OTHER CHEMICALS

Humic Supreme is compatible with a wide range of commonly used agricultural chemicals. When mixing with other chemicals, always mix a small quantity and observe for precipitation (fall out) in mixture. If precipitation occurs do not proceed with application. Jar test compatibility if in doubt. Humic Supreme can be combined with trace nutrients for foliar feeding but is incompatible with liquid calcium nitrate, phosphate fertilisers and sulphate based trace elements. Use Fulvic Express with these products.

#### CAUTION

Humic Supreme may stain fruit or foliage.

#### STORAGE AND HANDLING

Store in a cool dry area out of direct sunlight and away from heat.

#### EXPIRY

Use product within two years of opening.

#### LIMITED WARRANTY

Use only as directed on label and with suitably qualified advice. New Zealand Humates Ltd (NZH) accepts no liability for incorrect storage, handling or application, or for weather, plant, or soil conditions affecting performance. NZH accepts no responsibility for third-party statements. To the extent permitted by law (a) all warranties or guarantees are excluded (b) NZH shall not be liable for events or matters beyond its control or indirect or consequential loss of any kind (c) NZH's liability shall be limited to (at our option) the value of the product purchased or replacement of defective product.
